                 Preservation Associates, Inc., September 1995

**CA-163-BB-1**      Credit BG.    View shows the north and west facades  
                         of the building as seen when looking east southeast  
                         (124°).    Igniters for solid rocket motors were  
                         built and tested here. This building was rated for  
                         a maximum of 20 pounds (9.1 Kg) of class 1.1  
                         materials and four personnel. Note the lightning  
                         rods on roof corners and the exterior electrical  
                         system.
